

# WHY VIDEO VERIFICATION MONITORING?

**Video Verification Monitoring is an exciting new concept in Security, Loss Prevention, and Asset Protection, and is fast becoming the bench-mark for Quality Effective Asset Protection in the Industry.**

**Our basic theory is to practice pro-active, not re-active security.**

We vigilantly watch over your site during off hours, detecting the presence of anyone entering the area. Through advanced video verification, highly trained virtual guards and two-way audio interface, we determine their intent and act to protect your interests. Not only can we reduce your exposure to loss, but we can provide all of these advanced virtual solutions at a significant savings over your existing security systems, slashing your guard costs and potentially reducing your insurance premiums.

- Deter theft and vandalism with event driven response.
- Utilize existing cameras, access control and security systems.
- Minimize dependence on expensive guard services.
- Minimize costly and dangerous false alarms.
- Monitored Two-Way Audio and Video.
- Virtual Guard Tours (Supervise and Protect).
- Virtual escorts for employees and customers.
- We can distinguish between a potential customer or law breakers on your property.
- Provides you the ability to view your operations from any computer in the world.

# Our video monitoring program is designed to stand guard on your property and assets, while lowering your costs!

## DETECT

Using only the best in long range passive Infrared intrusion detection equipment and Video Analytic's; designed to deliver the maximum detection performance and minimum false alarm probability in the most demanding outdoor perimeter and area protection applications. **Nobody goes unnoticed on your property.**

## VIDEO PHOTOGRAPH

Using only the best in network digital video recording products combined with a full network of High Resolution cameras, Pan, Tilt and 22x Zoom Cameras. **Nobody on your property goes un-photographed.**

## TWO-WAY AUDIO

The personnel at our Video Monitoring Station can see, hear and speak to people at a remote location. **Two-way audio/video gives the Video Monitoring Station the ability to audibly intervene.**

## DISPATCH

Then add Full Video Remote Monitoring done by our Central Station with full remote audio capabilities. Trained Operators can deter theft using the talk down system on an intruder and or **dispatch the local police.**

## SAVE MONEY!

Using our programs we can save you up to a third of what you may be spending on guard services. And unlike your guard this system is everywhere at once, never sleeps or takes a break. We can also save you money on costly false alarms that are common with simple alarm systems...**we will not dispatch the police, unless there is an actual video verification of an intruder.**

We Offer Free On-Site Demonstrations and  
Free On-Site Risk Assessments Surveys.
